DETAILED ACTION

Remarks

This Office Action fully acknowledges Applicant's remarks filed on December 30th, 2009. Claims 1-6, 8-14, and 21-32 are allowed. Claims 7, 15-20, and 33 have been canceled.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John Gatz on March 10th, 2010.

The application has been amended as follows:

In the claims –

8. A format for optical analysis of a sample comprising:

an input light guide being formed by a first wall structure having a first end and a second end, said second end being coupled with an input reflector;

an output light guide being formed by a second wall structure having a first end and a second end, said second end being coupled with an output reflector; and

a light transmission segment disposed between said input reflector and said output reflector, said light transmission segment having a sample cavity; and

Art Unit: 1797

a lancet in communication with said sample cavity, said lancet being adapted to collect and deposit test material within said sample cavity,

wherein said input light guide, said input reflector, said light transmission segment, said output light guide, and said output reflector form an optical communication path, said optical communication path being continuous and closed between said first end of said input light guide and said input reflector and being continuous and closed between said first end of said output light guide and said output reflector.

9. The format of claim ~~33~~, 8, wherein said light transmission segment further includes a lid that has a reagent printed thereon, and wherein said lancet is adapted to deposit at least a portion of said test material within said sample cavity such that said at least a portion of said test material is positioned to interact with said reagent printed thereon.

10. The format of claim ~~33~~, 8, further comprising a venting channel connected to said sample cavity, wherein said lancet is positioned within said venting channel.

21. The format of claim ~~33~~, 8, wherein said lancet has a first end for collecting test material and a second end for depositing test material within said sample cavity.

Claim 33 is canceled.

Allowable Subject Matter

Claims 1-6, 8-14, and 21-32 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record, namely Meserol and Lundsgaard, do not teach or fairly suggest the formats for optical analysis as in independent claims 1, 8, and 24, in which the optical communication path is continuous and closed between said first end of said input light guide and said input reflector and is continuous and closed between said first end of said output light guide and said output reflector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see pages 8-11, filed December 30th, 2009, with respect to the rejections of claims 1-6, 8-14, and 21-30 have been fully considered and are persuasive. The rejection of claims 1-6, 8-14, and 21-30 has been withdrawn. Additionally, as such, newly added dependent claims 31 and 32 are allowable over the prior art for the reasons discussed above.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NEIL TURK whose telephone number is (571)272-8914. The examiner can normally be reached on M-F, 9-630.
